<b>Add-on modules</b>		
MIKE SHE Enterprise Engine for OfficeGRID - 5 clients	€ 7 500	€ 750

### Notes:

MIKE SHE Enterprise and MIKE SHE Studio come as standard with MIKE 11 HD250 Module as river component.  
MIKE 11 HD250 can be substituted with the other sizes of the MIKE 11 HD Module or MIKE 11 packages.  
MIKE SHE Studio is identical with MIKE 11 Studio.

Maintenance for the first year is included in the sales price. Subsequently the yearly maintenance price is as per the price lists; it covers hotline' assistance and a yearly update of the software. If no maintenance price is listed the maintenance price corresponds to 10% of the current module price. Maintenance for a module added at a later stage is charged at the maintenance price listed for the module. If add-on modules are added such that they result in a package as defined in the foregoing price lists the maintenance price will correspond to that of the package.

Software prices include one set of manuals and are exclusive of the operating system and shipping costs and taxes.

### Upgrades

The price of an upgrade from one package to another corresponds to the price difference between the packages. This assumes that both packages are of the latest version, i.e. if a package or module has not been upgraded to the latest version an upgrade surcharge will apply in order to make the versions compatible. Adding modules after initial purchase does not qualify for discounts.

### OfficeGRID

OfficeGrid can be used with any number of client computers in a network. The multi-client configuration requires one OfficeGrid Master license and one full engine license, plus a Client license and an engine license for each of the additional client computers. The OfficeGrid Client licenses and the additional engine licenses are sold in batches of five. OfficeGrid can also be used on a multi-processor computer. For a single multi-processor configuration, only the OfficeGrid Master license is required. No additional client licenses are required.

Prices are net prices and do not include taxes and shipping & handling costs.
